

VOGUE

Hands free video apartment station

Overview

The Vogue is a modern, stylish apartment station and is compatible with APEX systems. The Vogue allows an occupant of a dwelling to answer a call from a visitor at a communal entrance and have a hands-free, two-way simultaneous conversation. The video option allows the occupant to see and identify the visitor and their location. They can then enable the remote operation of the electric locking device to permit the visitor access.

The VOGUE has a one-piece glass front and the main body is constructed from a hard wearing ABS plastic which has good mechanical properties; impact resistance. The VOGUE is a 'surface mount' design with a metal wall bracket that can be optionally fitted over a 1 gang electrical back-box.

Technical characteristics

Display	7" TFT LCD, 800x480
Buttons	6x Capacitive Touch Sensitive Buttons:
