ePRO CALL POINT

PRO-DPA - 1 Button IP Video Call Point with Integrated High Security Access Control

Overview

The PRO-DPA is an IP Video Call Point with integrated high-security access control in a compact surface mount design. The built-in HD camera offers superior video quality with excellent low light performance and provides a full-colour picture day/night.
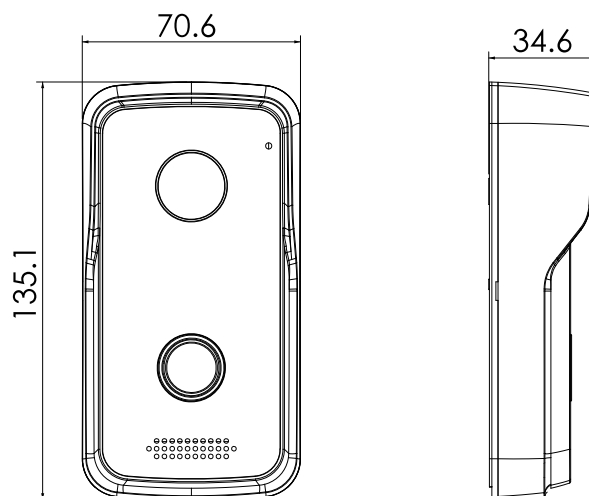

The call button is illuminated to indicate status and voice over spoken feedback enhances accessibility.

The integrated high-security access control streamlines the entrance experience for residents and staff. Security encryption prevents unauthorised cloning and protects people and their properties.
