INSTALLATION SPECIFICATION

It is the responsibility of the installer to follow CAME Entrotec's installation and cable specification as well as ALL relevant wiring regulations. Failure to comply with CAME Entrotec's installation and cable specification may result in erratic operation of equipment and could invalidate any warranty.

Installations must comply with the following applicable standards:

- BS 7671: Requirements for electrical installations. IET Wiring Regulations 18th Edition.
- The Electricity at Work Regulations 1989
- ANSI/TIA-568.0-D: Generic Telecommunications Cabling for Customer Premises.
- ANSI/TIA-568.1-D: Commercial Building Telecommunications Cabling Standard.

IET Wiring Regulations 18th Edition: Regulation 444 (MEASURES AGAINST ELECTROMAGNETIC DISTURBANCES) imposes requirements for segregation of circuits.

IET Wiring Regulations 18th Edition: Regulation 528 (PROXIMITY TO WIRING SYSTEMS TO OTHER SERVICES) imposes requirements for segregation of door entry / access control circuits (Band I), 230VAC mains circuits (Band II) and other higher voltage circuits.

IET Wiring Regulations 18th Edition: Regulations 541 and 542 impose requirements for earthing and bonding conductors. Ensure ALL metalwork is bonded to the buildings earth, this includes call panels, exit switches, cabinets and metal conduit. Ring terminals and earth points are provided on call panels and cabinets to terminate earth cables, ensure these connections are made.

★ WARNING - ISOLATION OF ELECTRICAL EQUIPMENT

In compliance with The Electricity at Work Regulations 1989, electrical equipment should be made dead to prevent danger while work is carried out on or near that equipment. No person shall be engaged in any work activity on or so near any live conductor.

WARRANTY AND SUPPORT

CAME Entrotec systems are renowned for their reliability and have a 2-year warranty on all CAME Entrotec manufactured products as standard. This warranty does not cover water damage, vandalism, mains electrical faults, lightning strikes, damage caused by miswiring or cable faults.

CAME Entrotec offer complimentary training courses and telephone support: 01506 886 235 - 9am to 5pm Mon-Fri. technicalsupport@entrotec.co.uk

CABLE SPECIFICATION

The cabling system is based on Unshielded Twisted Pair **Category 5e** (Cat5e) or **Category 6** (Cat6). The cable must be **annealed pure copper**, meeting or exceeding the requirements defined in the standard ANSI/TIA 568 C.2.

Failure to comply with this cable specification may result in erratic operation of equipment.

The specification below shows the minimum cable requirements, allow for extra cabling if redundancy is required.

	Connection	Cable
A	Access controller to each reader:	1x Cat5e or Cat6.
В	Access controller to locks:	2x 1.5mm² multi-stranded flex or singles (route through any exit/fire switch or break glass for fail safe operation).
С	Access controller to exit switch:	1 Pair UTP (2 cores), Cat5e or Cat6.
D	Access controller to fire switch:	1 Pair UTP (2 cores), Cat5e or Cat6.

4.1 INPUT + EXIT SWITCH CONNECTIONS

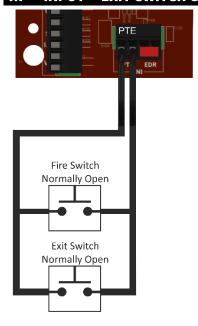

FIGURE 4-1

For double pole push to exit / fire switches with fail open locks, see section 4.2.

4.2 FAIL OPEN LOCK CONNECTION

Connection for fail open locks (power to hold), e.g. magnetic locks.

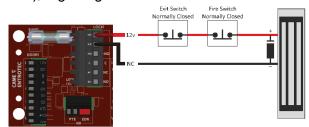

FIGURE 4-2

4.3 FAIL CLOSED LOCK CONNECTION

Connection for fail closed locks (power to release), e.g. electric strike.

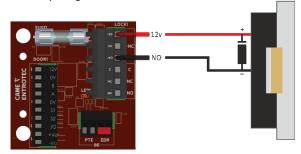

FIGURE 4-3

4.4 EMERGENCY DOOR RELEASE

For fail-safe door release operation, remove **EDR** link and connect a Volt-free Normally Closed circuit (open-circuit to unlock).

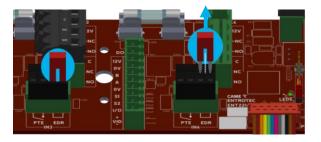

FIGURE 4-4 - E.G. FIRE ALARM DROPOUT APPLICATION

4.5 LOCK SUPPRESSION

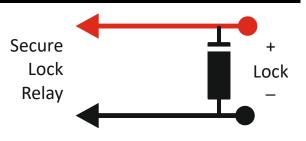

FIGURE 4-5 - 1N4007 DIODE FITTED AT LOCK

CAME Entrotec recommend locks with built in suppression. If such a lock is not being used it is ESSENTIAL to fit suitable suppression, as close to the lock as possible. This prevents back EMF and spikes from damaging equipment and causing erratic operation.

WARNING

Failure to fit adequate suppression may invalidate any warranty.

SUITABLE SUPPRESSION

CAME Entrotec supply 1N4007 diodes.

5 READER CONNECTIONS

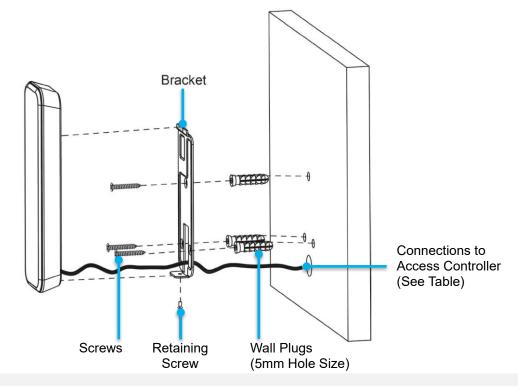

FIGURE 5-1

Colour	Connection to Access Controller	Description	
Red	DC12V	12V DC - power input	
Black	GND	0V	
Blue	CASE	Tamper Alarn	
White	D1	Wiegand outputs	
Green	D0	(when using Wiegand protocol)	
Brown	LED control input		
BIOWII	LED	(when using Wiegand protocol)	
Yellow	RS485 B	RS485 (when using RS485 protocol)	
Purple	RS485 A		

6 NETWORK CONNECTION

Connection	Cable Type	Detail
Ethernet from Network Switch to	1x Cat5e or Cat6	RJ45 - T568B
LAN.

7 DEFAULT IP ADDRESS

The default IP address for the PRO-AC4 is **192.168.1.108**. To change the IP address please follow the steps below:

- 1. Connect a laptop or PC to the same network as the Access Controller.
- 2. Using the ePRO Config tool, change the IP address of the PRO-AC4 using the default credentials:

Username: adminPassword: admin123

I NOTE

For further info on configuring the Access Controller using ePRO config tool, please refer to ePRO-Config User Guide.
