# SIMPLEKEY COMMUNICATIONS MODULE (CM)

COMMUNICATIONS MODULE FOR SIMPLEKEY PLATFORM

Available in three versions, 4G, IP & Multi allowing the SimpleKey System Controller to easily connect to SimpleKey Web;

- CM-4G mobile cellular communications controlling up to 16 doors.

- CM-IP IP & auxiliary communications ports for connection to legacy and 3rd party hardware, controlling up to 16 doors.

- CM-Multi combining the features of 4G and IP with additional 'Master' controller allowing connection for a further 3 systems controlling up to 64 doors.

- Connection via 4G or Broadband

- Up to 4 system controllers can be connected by one 4G connection

- Multiple system controllers can be connected on one existing internet connection

- Pre-programmed with plug and play connection

- IP or RS485 communication between modules

TECHNICAL INFORMATION

- 4G connection requires a correctly positioned high gain aerial
- LED display showing 4G signal strength and connection
- Maximum cable run using IP is 100m point to point

- Maximum cable run using RS485 is 500m (limited to two controllers)
- Communication baseboard available allowing legacy controllers to be connected to the SimpleKey Web using a Multi IP communications module

	Multi	4G	IP
Mobile Comms	X	X	
IP Comms	X		X
Extra Peripherals by RS232/RS485	X
